CLAIMS

1-26. (Canceled)

27. (New) A light source device comprising:

a light source assembly, wherein said light source assembly is comprised of a plurality of compact fluorescent light bulbs possessing different color temperatures, and wherein said light source assembly is operable for selectively lighting said plurality of compact fluorescent light bulbs;

a tripod assembly connected to said light source assembly;

a translucent diffuser assembly connected to said light source assembly; and

an umbrella assembly connected to said light source assembly,

wherein said plurality of compact fluorescent light bulbs is selected from the group comprised of a Daylight 6400K bulb, a Truetone 5000K bulb, a Cool White 4100K bulb and a Warm White 3700K bulb.

28. (New) The light source device of claim 27, further comprising a carrying case assembly operable for storing said light source device.

29. (New) A light source device comprising:

a light source assembly, wherein said light source assembly is comprised of a plurality of floodlight fluorescent light bulbs possessing different color temperatures, and wherein said light source assembly is operable for selectively lighting said plurality of floodlight fluorescent light bulbs; a tripod assembly connected to said light source assembly; and a carrying case operable for storage of said light source device, wherein said plurality of floodlight fluorescent light bulbs is selected from the group comprised of a floodlight Daylight 6400K bulb, a
